Wash contaminated clothing prior to re-use.

6.3 Methods and material for containment and cleaning up

Methods for cleaning up

Clear spills immediately. Remove all sources of ignition. Remove persons to safety. Ventilate affected area. Special danger of slipping by leaking/spilling product. Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Do not breathe vapour/aerosol.

Dispose of waste according to applicable legislation.

Remove all sources of ignition.

Wipe up with absorbent material (eg. cloth, fleece).

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling

Provide for sufficient ventilation, particularly in closed rooms.

Avoid contact with eyes and skin.

Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.

Keep cool. Protect from sunlight. Remove all sources of ignition.

Store at temperatures not exceeding 38 °C/100 °F.

7.2 Conditions for safe storage, including any incompatibilities

Storage space and container requirements

Handle containers carefully to prevent damage and spillage.

Hints on storage assembly

Keep away from strong acids, strong bases and strong oxidizing agents to avoid exothermic reactions.

Storage specifications

Limit storage of flammable material to approved areas. Store bottles away from heat. Keep away from open flame of bunsen burner or furnace. Keep containers tightly sealed. Avoid storing near acids, chlorinated solvents. Storage temp: 60° C/140° F min. Containers may be hazardous when empty. Emptied containers contain residue.

Respiratory protection	If workplace exposure limits are exceeded, a respiration protection approved for this particular job must be worn.
Hand protection	Wear protective gloves.
Eye protection	Wear eye glasses with side protection according to EN 166.
General protective and hygiene measures	Provide for sufficient ventilation, particularly in closed rooms. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. In case of inadequate ventilation wear respiratory protection.
Engineering measures	Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.
